Steps to install an AT&T VPN Gateway 8300

Complete the following steps:

1. Unpack the box.
2. Connect the power cord to the locking power socket **A** on the back of the device.
Note: Make sure the locking clip on the power plug is pointed upward.
3. Insert the Ethernet cable into WAN Port 1 **B** and to a LAN port on your DSL or Cable modem or gateway
4. Wait until the Power, Online and VPN lights **C** are steady green (not blinking)
5. Your AT&T VPN Gateway 8300 is now connected to the GBT network and is ready for use
6. Using an Ethernet cable connect your GBT PC / Laptop to LAN Port 1 **D** on the AT&T VPN Gateway 8300
